

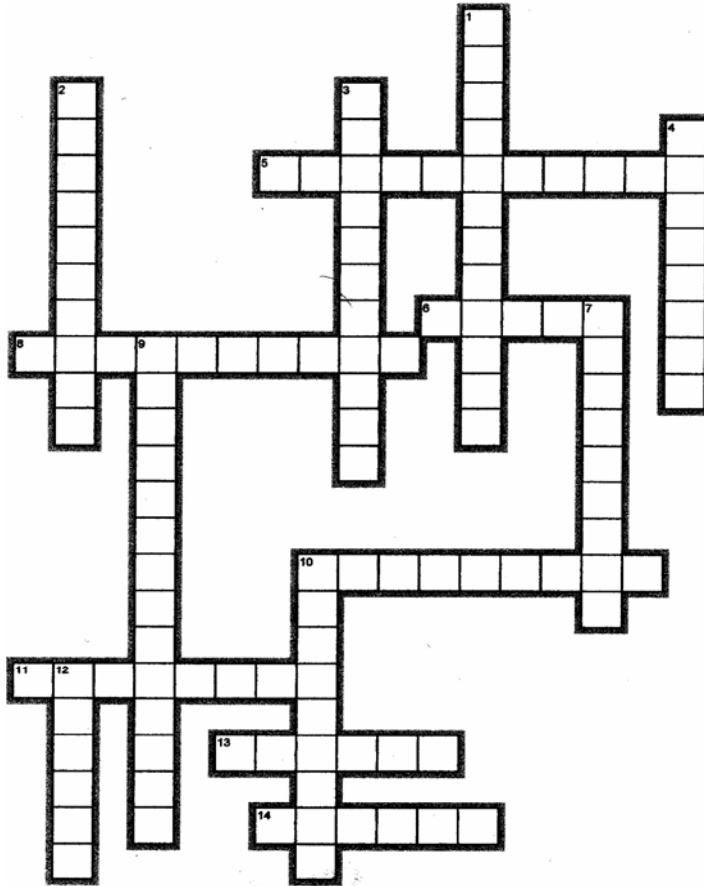

Charting Vocabulary

Across

5. object that represents the individual values; marker can be a bar, column, etc.
6. visual display of data in a spreadsheet
8. chart that shows a trend in data over a period of time.
10. chart that shows only one data series and is used to compare sizes of each part to the whole
11. chart that is also known as a scatter chart and used to show relationships between two values
13. category axis that describes what is shown in the chart
14. the object that explains the symbols, colors, or patterns used to differentiate the series in the chart

Down

1. chart that shows how values change over a period of time; most popular chart type.
2. single value or piece of data from the data series
3. a collection of related values from the worksheet; one row/column on the worksheet
4. horizontal or vertical line that extends across the plot area of the chart to make it easier to read/understand the values
7. small line or marker on the X- and Y- axes to help in reading the values
9. chart that appears on the same sheet as the worksheet data
10. the rectangular area bounded by the category and value axes
12. value axis that shows the range of values (or scale) of the chart

Spreadsheets

Use spreadsheet software with alternative input devices.
