

## Plan, Create, and Save a Database

**STEP 1:** Using the guidelines of the database software application available, *plan* this database by determining the field names and types. Write in the blanks below.

field name: \_\_\_\_\_  
 field type: \_\_\_\_\_  
 field size: \_\_\_\_\_

field name: \_\_\_\_\_  
 field type: \_\_\_\_\_  
 field size: \_\_\_\_\_

field name: \_\_\_\_\_  
 field type: \_\_\_\_\_  
 field size: \_\_\_\_\_

Popular AntiVirus Software Titles	Price	Rating out of possible 5
.Mac 2.5 Retail	\$76.99	4.78
PC-Cillin 2003	\$26.99	4.2
Norton AntiVirus 2002 Professional Upgrade	\$39.54	4.17
Bullguard AntiVirus Firewall	\$39.99	4
Norton Personal Firewall 2005	\$42.50	4
Stomp Spy Ware X-terminator	\$22.79	3.83
eTrust EZ AntiVirus 2005	\$24.99	3.8
Zone Alarm Internet Security Suite	\$59.99	3.6
PC-Cillin Internet Security 2005	\$39.99	3.55
Webroot Spy Sweeper Internet Essentials Suite	\$54.99	3.67
McAfee AntiVirus Suite	\$39.99	4.25
Ad-Aware	\$59.99	4

**STEP 2:** *Create* the database by utilizing the field names and sizes determined above. Type your name, date, class below the last line of data or write your name on it upon printing. **Save** the database file as **Activity G701-03**. **Save** this table as **AntiVirusstudent**. **Print** the table according to the instructor's directions. (Hint: The rating numbers may "round up/down" if the user does not select the field type of currency, standard format.)

### Databases

Use database software with alternative input devices.
